

Practical Assessment Tasks

1. HTML Document Structure

- **Task:** Create a complete HTML document that includes:
 - A `<head>` section with a title
 - A `<body>` with:
 - A main heading
 - A subheading
 - At least two paragraphs of text
 - An unordered list with at least five items

2. Form Design

- **Task:** Create a registration form that includes:
 - Fields for:
 - First Name (text input)
 - Last Name (text input)
 - Email (email input)
 - Password (password input)
 - Gender (radio buttons for Male, Female, Other)
 - Interests (checkboxes for at least three options)
 - A submit button

3. Image Gallery

- **Task:** Design a simple image gallery webpage that includes:
 - A title and heading
 - At least three images displayed
 - Each image should have a caption below it
 - Use the `<figure>` and `<figcaption>` tags for each image

4. Navigation Bar

- **Task:** Create a navigation bar for a website with:
 - Links to at least five different sections (e.g., Home, About, Services, Contact, Blog)
 - The navigation should be styled using CSS to be horizontal.

5. Semantic HTML

- **Task:** Rewrite a basic webpage using semantic HTML elements. Include:
 - A header with a site title and navigation
 - A main content area with articles and sections
 - A footer with copyright information

6. HTML Template Creation

- **Task:** Create a simple HTML template that could be reused for multiple pages. The template should include:
 - A header with a title
 - A footer with navigation links
 - A placeholder for content that can be filled in on different pages
